

Neighborhood Notification: Bicycle Improvements on 20th Street from Van Buren Street to Roosevelt Street

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 20th Street from Van Buren Street to Roosevelt Street.

What: Where there is enough space on the roadway, buffers will be added to existing bike lanes. The number of travel lanes will remain the same.

When: Pavement maintenance (new asphalt) is scheduled for Summer 2022 and traffic lane improvements will happen shortly after.

Why: Buffers add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffered bike lanes will help to guide cars and deter speeding.

What Will the Project Look Like?

Current Travel Lanes

Van Buren Street to Polk Street

Polk Street to Villa Street

Proposed Travel Lanes
