\*Index Rate equals crimes per 100,000 population  
Source: Phoenix Police Uniform Crime Reporting

Total violent crimes include criminal homicide (murder, negligent, and non-negligent manslaughter), forcible rape, robbery, and aggravated assault. Aggravated assaults are counted by victim. Uniform Crime Reporting counts should not be compared with Arizona Revised Statute numbers. UCR data excludes unfounded cases. Clearances are not always counted in the month of the incident. Population figures are provided by the City of Phoenix Planning Department and are based on the Maricopa Association of Governments, Draft 3 Population & Unemployment Data, April 2003. These population numbers are projections based on the Municipal Planning Area (MPA) rather than the actual incorporated limits of the city, due to the changing nature of city boundaries. Prior to 2003, population was only reported based on the MPA. All population values are based on the projections that were available at the time the information was initially collected. Prior year projections have not been updated. The corporate limits population estimate as of October 1, 2006 was 1,516,344.
