

Neighborhood Notification: Bicycle Improvements on 35th Avenue from Agua Fria Freeway to Deer Valley Drive

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 35th Avenue from Agua Fria Freeway to Deer Valley Drive

What: Where there is enough space on the roadway, buffers will be added to existing bike lanes. The number of travel lanes will remain the same. This project does not remove or add parking.

When: Pavement maintenance (new asphalt) is planned for Spring 2024 and traffic lane improvements will happen shortly after.

Why: Buffers add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffers will help to guide cars and deter speeding.

What will the Project Look Like?

Travel Lanes from Agua Fria Freeway to Deer Valley Dr
