

Neighborhood Notification: Bicycle Improvements on 85th Avenue from McDowell Road to Palm Lane

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 85th Avenue from McDowell Road to Palm Lane

What: Where there is enough space on the roadway, buffered bike lanes will be added. The number of travel lanes will remain the same. No parking will be removed.

When: Traffic lane improvements are planned for Spring 2024.

Why: Buffered bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffered bike lanes will help to guide cars and deter speeding.

What will the Project Look Like?
