

Neighborhood Notification: 95th Avenue / Encanto Boulevard from McDowell Road to 91st Avenue

As part of the Street Transportation Department’s core mission, we strive to improve the City’s roadways to create a safe and efficient transportation network. An upcoming paving project provides opportunities to change striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 95th Avenue / Encanto Boulevard from McDowell Road to 91st Avenue

What: Where there is enough space on the roadway, existing bike lanes will be widened, and buffers will be added to existing bike lanes. The number of travel lanes will remain the same. The project does not remove or add parking.

When: Pavement maintenance (new asphalt) is planned for Spring 2024 and traffic lane improvements will happen shortly after.

Why: Buffers add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffers will help to guide cars and deter speeding.
