

Neighborhood Notification: Bicycle Improvements on Corona Avenue from 32nd Street to 36th Street

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing review of street design provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: Corona Ave from 32nd St to 36th St

What: Where there is enough space on the roadway, buffered bike lanes will be added. The number of travel lanes will remain the same. No parking will be removed.

When: Traffic lane improvements are planned for Spring 2024.

Why: Buffered bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffered bike lanes will help to guide cars and deter speeding.

What will the Project Look Like?

Travel Lanes from 32nd St to 36th St
