

Neighborhood Notification: Bicycle Improvements on University Drive / Magnolia Street from 24th Street to 24th Street

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing paving program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: University Dr / Magnolia St from 24th St to 24th St

What: Where there is enough space on the roadway, buffered bike lanes will be added. The number of travel lanes will remain the same. The project does not remove or add parking.

When: Pavement maintenance (new asphalt) is planned for 2024 and traffic lane improvements will happen shortly after.

Why: Buffered bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffered bike lanes will help to guide cars and deter speeding.

What will the Project Look Like?

Travel Lanes from 24th St to University Dr Curve
